Open Data Certificates

Node Strategy Days · Jeni Tennison

Objectives

- Understand what Open Data Certificates are
- Understand how to localise them for your country
- Discuss other services that might be offered around the certificates

OPEN DATA CERTIFICATE

Goals for Reusers

What matters to reusers?

Want to easily find open data

Then they want to know:

> what they can legally do

> whether they can rely on the data

> what the data means

And be able to get some support

Goals for Publishers

What would help publishers do better?

Avoid just more documentation

Interactive tool

      questionnaire / checklist

      badge indicating success

      pointers for next steps

Goals for Policy Makers

How do you set the bar?

Shorthand set of requirements

    use in policy documents

    use in contracts

Measurement framework

    quality as well as quantity

Certify your open data

Show that it's easy to **find, use** and **share**

3

Open Data Certificate

Quality badge & measure for data
Guide for improving that quality
Questions about four aspects

      legal (rights, licensing, privacy)
      practical (guarantees, quality)
      technical (formats, metadata)
      social (documentation, support)
